

IN THE SPECIFICATION

On page 4, please replace the paragraph beginning at line 8 with the following paragraph:

The adapter 38 may include ~~a~~ an expandable collet 40 having an inside diameter sized for snugly receiving the threaded spud 22 and an outside diameter for snugly fitting the tank outlet 16.

On page 4, please replace the paragraph beginning at line 12 with the following paragraph:

A flange 44, centered on the collet ~~38~~40, and extending radially therefrom is provided for engaging an outside surface 46. The adapter is preferably formed from any suitable material such as plastic or metal.

On page 4, please replace the paragraph beginning at line 17 with the following paragraph:

A spud nut 54 is provided for rotation about the threaded spud 22 to center the adapter within the opening 16. A sponge gasket 56 provides a seal between the tank 14 and a bowl, not shown.
